Education

Vellore Institute of Technology — Vellore, India
Bachelor in Technology Computer Science(IoT), 9.09 CGPA — *Aug. 2023 – 2027*

Amity International School — Lucknow, India
Senior Secondary School - 90.2 — *2023*

Amity International School — Lucknow, India
High School - 90.2 — *2021*

Experience

Flipkart — Bengaluru, India
iOS UI Intern — *May 2026 – July 2026*

- Integrated the AppsFlyer SDK across two iOS codebases for event tracking and deep-link attribution by building a native Analytics Orchestrator using **Swift**, **Objective-C++**, and **React Native TurboModules/JSI**, enabling multiple analytics providers and complete Add-to-Cart event tracking.
- Reduced iOS cold start time by **21%** by eliminating main-thread launch bottlenecks, moving configuration bootstrap off the critical launch path, and replacing a fixed splash-screen timeout with a device-aware adaptive timeout based on available RAM.
- Resolved an iOS 26 scroll performance regression by patching the **react-native-bottom-tabs** library in Objective-C to implement transform-based bottom tab animations synchronized with live scroll position through a custom native React Native prop using **patch-package**.
- Led the migration to a centralized server-driven **AppConfig.json** pipeline by replacing approximately eight hardcoded configuration domains with a decoded and cached configuration system, enabling runtime configuration updates without requiring App Store releases.

Projects

Hostel Buddy | *React.js, Node.js, Express.js, MySQL, REST APIs,Cloudinary* — Nov 2025 - Feb 2026

- Built a full-stack hostel management platform that enables students to view room availability, submit maintenance requests, access hostel information, and interact with an AI-powered room recommendation assistant.
- Developed RESTful APIs using Node.js and Express.js with MySQL for persistent storage, integrated Cloudinary for image management, and implemented secure authentication and role-based access control.
- Integrated a Flask-based AI service for room availability prediction and recommendations, with a responsive React frontend featuring dynamic image galleries, smooth animations, and real-time data fetching.

Inventory Management System | *Reactjs, Expressjs, MongoDB, Nodejs* — June 2025 - July 2025

- Developed a full-stack web application using MERN Stack
- Implemented JWT-based authentication middleware in Node.js to securely validate access tokens, handle token expiry, and protect API routes
- Developed backend logic for order creation, inventory deduction, and automated email alerts to ensure seamless order tracking and stock management.

Care Point | *HTML5, CSS3, JS, Reactjs, Expressjs, MySQL* — March 2025

- Web Development Application Made for hostel students to lodge their complaints, feedback, requisitions, etc.
- Designed and developed a Node.js + Express backend for a hostel maintenance management system, integrating MySQL for data persistence, secure user authentication (bcrypt), and file uploads (Multer) for proof documents.
- Implemented dynamic reporting features with export options to PDF (PDFKit), Excel (ExcelJS), and Word (docx), enabling admins to generate student-, weekly-, monthly-, or work-type-based reports efficiently.

Technical Skills

Languages: Swift, Objective-C++, TypeScript, JavaScript, Python, Java, C++, C, SQL
Frameworks: React Native, React.js, Node.js, Express.js, Fabric, TurboModules (JSI)
Developer Tools: Git, GitHub, Xcode, Visual Studio Code, Android Studio, Postman
